	conference held by RPD Berlin about one routh ago. was stated that the Perlin rail circuit was scheduling the spring of 1957. At the conference it was also if Firkenwerder - Wusterrark sections of this rail circuit and that construction work on the last remaining go Saar and had just been started. It was learned that the SED Central Committee strong reported completion date of the Berlin rail circuit possibly required for the clarification of the Berlin Schedulin Schedul	At this conference, it 25X1 led to be completed by made known that the routh had been completed ap between Golm and angly objected to the tin view of the measures lin situation after the rs that the SED Central rlin. Although the Ferlin rain on freight traffic, roject was a possibility erlin from GDR railroad ptember, the number of ankment through Lake mund was increased from the piecework wages of the ased, while the piecework	
	conference held by RPD Berlin about one routh ago. was stated that the Perlin rail circuit was schedulate spring of 1957. At the conference it was also a firkenwerder - Wusterrark sections of this rail circuit and that construction work on the last remaining and that construction work on the last remaining and that the SED Central Committee stropered completion date of the Berlin rail circuit possibly required for the clarification of the Berlin rail circuit possibly required for the clarification of the Berlin rail circuit possibly required for the clarification of the Berlin rail circuit committee still believes in a neutralization of Berlin circuit will considerably ease the present state hasic concept underlying the designs of this possible concept ellerinating the western sectors of Baraffic. It was pointed out in this connection that on 1 Seworkers employed on the erection of a railroad embarterplin on the railroad line between Golm and Saar 3,000 to 5,000. Another remarkable fact was that the construction workers employed there had been increwages of construction workers in other nationalize to be cut.	At this conference, it 25X1 led to be completed by made known that the reuit had been completed ap between Golm and angly objected to the tin view of the measures lin situation after the restract the SED Central rlin. Although the Ferlin rain on freight traffic, roject was a possibility erlin from GDR railroad ptember, the number of ankment through Lake mund was increased from the piecework wages of the ased, while the piecework denterprises are scheduled trustion of a railroad ded in preliminary construction learned that the last remaining completed by 1 October 1956, the progress of construction	25X*
3.	conference held by RPD Berlin about one routh ago. was stated that the Perlin rail circuit was schedul the spring of 1957. At the conference it was also a Firkenwerder - Wusterrark sections of this rail cir and that construction work on the last remaining greater and had just been started. It was learned that the SED Central Committee stro reported completion date of the Berlin rail circuit possibly required for the clarification of the Ber Foreign Ministers' Conference in October. It appea Committee still believes in a neutralization of Ber ail circuit will considerably ease the present at the basic concept underlying the designs of this p of completely eliminating the western sectors of B traffic. It was pointed out in this commection that on 1 Se workers employed on the erection of a railroad emb Templin on the railroad line between Golm and Saar 3,000 to 5,000. Another remarkable fact was that t construction workers employed there had been incre wages of construction workers in other nationalize to be cut. the const embankment through Lake Templin had not been inclu plans of the railroad administration. It was also gap of the Ferlin rail circuit was scheduled to be The GDR press has been directed not to report on t work. The GDR !'Inistry of Traffic has reserved for	At this conference, it 25X1 led to be completed by made known that the routh had been completed ap between Golm and angly objected to the tin view of the measures lin situation after the restrict that the SED Central rlin. Although the Ferlin rain on freight traffic, roject was a possibility erlin from GDR railroad ptember, the number of ankment through Lake mund was increased from the piecework wages of the ased, while the piecework denterprises are scheduled trustion of a railroad ded in proliminary construction learned that the last remaining completed by 1 October 1956, the progress of construction itself the right to inform	25X′
3.	conference held by RPD Berlin about one ronth ago. was stated that the Perlin rail circuit was schedulate appring of 1957. At the conference it was also rirkenwerder - Vusterrark sections of this rail circuit and that construction work on the last remaining great and had just been started. It was learned that the SED Central Committee stroreported completion date of the Berlin rail circuit possibly required for the clarification of the Ber Foreign Ministers' Conference in October. It appeases the foreign Ministers' Conference in October. It appeases the basic concept underlying the designs of this profective still believes in a neutralization of Ber rail circuit will considerably ease the present at the basic concept underlying the designs of this profective employed on the western sectors of Braffic. It was pointed out in this commection that on 1 Seworkers employed on the erection of a railroad emb Terplin on the railroad line between Golm and Saar 3,000 to 5,000. Another remarkable fact was that the construction workers employed there had been increvages of construction workers in other had been increvages of construction workers in other nationalize to be cut. The construction that administration. It was also gap of the Ferlin rail circuit was scheduled to be The GDR press has been directed not to report on twork. The GDR Ministry of Traffic has reserved for the public on this project in due course.	At this conference, it 25X1 led to be completed by made known that the routh had been completed ap between Golm and angly objected to the tin view of the measures lin situation after the restrict that the SED Central rlin. Although the Ferlin rain on freight traffic, roject was a possibility erlin from GDR railroad ptember, the number of ankment through Lake mund was increased from the piecework wages of the ased, while the piecework denterprises are scheduled trustion of a railroad ded in proliminary construction learned that the last remaining completed by 1 October 1956, the progress of construction itself the right to inform	25X′ 25X′ 25X′ 25X′
